

400 SERIES

Casement & Awning Windows

Beauty

The rich wood interior adds beauty and charm to any home.

Weathertight Performance

High-Performance™ Low-E4® glass helps insulate against heat and cold, which can help cut energy bills. It also filters UV rays that can fade fabric and damage furniture. In addition, durable weatherstripping helps create a tight seal against air and water.

Durability

Andersen® windows combine the strength and insulation of natural wood on the inside with seamless, low-maintenance cladding on the outside. The vinyl-encased sash prevents warping, too.

Smooth Operation

Smooth Control™ hardware features stainless steel hinges and nylon glides that make opening and closing the window extra smooth.

Easy Cleaning

 High-Performance Low-E4 glass has an exterior coating that stays cleaner, dries faster for easy cleaning and has up to 99% less water spots (exterior pane only when activated by sunlight). And the split-arm operator moves the sash away from the frame for easier cleaning.

Owner-2-Owner® Limited Warranty

Glass is covered for 20 years and non-glass parts are covered for 10. Coverage is not pro-rated and can add real value when the home is sold.

features & options

With High-Performance™ Low-E4® glass, these products are designed to use less energy, help you save money on utility bills and help protect the environment.

Choose from a variety of grille options: standard, specified equal light and custom patterns are available.

Optional TruScene® insect screens feature micro-fine mesh that lets more light and fresh air into your home, yet keeps even the smallest insects out.

Classic Series™ hardware available in white or stone finish. *Optional folding hardware also available.*
